

Term 2 2021: Einsteins Club – Years 3 and 4

Venue: Brighton Grammar School

Term Fee: \$285

(Semester enrolments available for \$570)

Science is exciting – it helps explain the world as we know it and it provides us with a methodology to enhance our understanding of every aspect of the universe from the micro to the macro level. Highly able children are naturally curious - their search for knowledge and meaning, and their engagement with abstract ideas is well suited to the exploration of all areas of science, technology and mathematics.

The Einsteins club program offers a smorgasbord of hands-on learning across a range of sciences as well as some mathematics. Along the way children will have the opportunity to think and work like a scientist, proposing and testing their hypotheses via experimentation, observation and modification. Extending and challenging club members' thinking during these sessions is considered paramount.

FULL SESSION OUTLINES COMING SOON!

Date	Meeting	Focus
24 April	Meeting 5	
8 May	Meeting 6	
22 May	Meeting 7	
5 June	Meeting 8	

Club Leader: Pete Wolstenholme

Pete has a passion for finding new and exciting ways of engaging students which has led him to his current role with RethinkPD and teaching with G.A.T.E.WAYS. He loves finding hidden order and patterns in seemingly chaotic mathematical situations and believes these skills are particularly important for our increasingly online world. Having benefitted from a gifted program when he was at school, Peter is keen to 'pay it forward' and provide a new generation with enriching and challenging learning experiences.
